

CHATHUNI SUHANSA

BSc (Hons) in Information Technology
Specialization in Artificial Intelligence (UG)

(+94) 71 546 3798 | chathunisuhansa0@gmail.com | Rathmalgoda, Polgahawela | Linkedin | Github

PROFESSIONAL PROFILE

EMotivated Information Technology undergraduate specializing in Artificial Intelligence with hands-on experience in full-stack development, IoT systems, machine learning, and web application development. Skilled in Java, Python, ReactJS, SQL, and MERN stack technologies with strong teamwork and project leadership abilities.

JOB EXPERIENCE

Extended Producer Responsibility Pvt Ltd - IT Executive (Part-Time) **[March 2026 – Present]**

- Achieved promotion from Junior Executive to IT Executive due to consistent performance, technical expertise, and valuable contributions to IT operations and application development
- Maintain and optimize updates for the EPRS web application, Improved platform stability and user navigation through continuous maintenance and optimization of the EPRS web application.

Ceylon Waste Management Ltd - Junior Executive **[November 2025 – March 2026]**

- Managed daily data entry and reporting workflows, accurately processing operational records per week to streamline team project coordination. Gained professional experience in operational workflows and team collaboration.

PROJECTS

Project Manager – Official Web Application (Extended Producer Responsibility Pvt Ltd) **[February 2026 - May 2026]**
epr-srilanka.com

- Contributed to the development and coordination of the official web application, ensuring on-time delivery of project milestones through effective team collaboration
- Designed and deployed a fully responsive interface on Hostinger, resulting in a 99% increase in mobile user accessibility and seamless page performance.

Official Website for eprs.lk (Extended Producer Responsibility Pvt Ltd) **[February 2026 - April 2026]**

Technologies and Tools: HTML, CSS, Hostinger (Web hosting)

- Designed and enhanced the official company website for eprs.lk using HTML and CSS.
- Applied a responsive and user-friendly interface to showcase company information and services.
- Deployed and hosted the website on Hostinger, ensuring smooth accessibility and performance.

Client based Website - Tour Package Management System with AI Chatbot (Mobile App) **[January 2026 - May 2026]**

Technologies and Tools: MERN stack (MongoDB, Express.js, React, and Node.js), GitHub, Visual Studio Code
| Group project | User Management and Hotel Accommodation system

- Enhanced a responsive frontend and built RESTful APIs to ensure smooth real-time application functionality.
- Engineered secure User Management features including Google Sign-In, profile image uploads, and OTP password recovery.
- Created a comprehensive Hotel Accommodation admin system for dynamic room management (CRUD operations) and role-based user controls.
- Integrated an AI-powered chatbot to deliver personalized, real-time tour package recommendations to users

AI and Machine learning mini Project | Group project **[August 2025 - November 2025]**

Technologies and Tools: Jupyter Notebook, Python

- Led a team of 6 students as Group Leader, coordinating sprints and pipelines to deliver the mini project ahead of schedule.
- My contribution was implementing data balancing techniques and developing the final machine learning pipeline, including preprocessing, training, and evaluation.
- Implemented data balancing and preprocessing techniques in Python, improving final machine learning model accuracy.

Web based wildlife safari trip Management system | Group project **[July 2025 - November 2025]**

Technologies and Tools: Java , IntelliJ IDEA, Spring Boot, SQL, Agile Collaboration

- Managed the wildlife safari booking project as the Group Leader, managing team tasks and development workflow.
- Improved backend functionality using Spring Boot and applied object-oriented programming principles.
- My contribution was developing the Online Safari Booking System with trip search, package selection, online booking, and CRUD functionalities using SQL database management.

Web based Medical Appointment system | Group project **[February 2025 - June 2025]**

Technologies and Tools: Java , IntelliJ IDEA, Apache Tomcat Server

- Developed a web-based system to manage medical appointments, patient records, and scheduling.
- Implemented backend functionalities using Java and Apache Tomcat, improving server-side processing efficiency and system stability.
- Designed features to improve appointment booking efficiency and enhance user experience.

Gas leakage detector (Home automation system) - Arduino UNO | Group project **[June 2024 - November 2024]**

Technologies and Tools: Arduino UNO, C Programming Language, LPG Gas Sensor, GSM Module (SMS Sender), Buzzer Alarm, Exhaust Fan

- Developed a real-time IoT-based LPG gas leak detection system, enhancing household safety through automated sensor monitoring, instant alert notifications, and improved response time to potential hazards.
- Enforced real-time alerts using a buzzer alarm and SMS notifications via GSM module. Automated exhaust fan activation for ventilation upon gas detection using sensor-based control.

Personal Learning

- Utilized Microsoft Power BI for self-learning and data analysis, creating dashboards to interpret datasets and improve decision-making insights

TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript, SQL, C
- **Frontend:** HTML5, CSS3, ReactJS
- **Backend:** Node.js, Express.js, Spring Boot, Apache Tomcat
- **Database:** MongoDB, MySQL
- **Tools:** Power BI, VS Code, IntelliJ IDEA, Figma, Canva
- **Concepts:** REST APIs, OOP, SDLC, Machine Learning, IoT
- **Version Control:** Git, GitHub
- **Full-Stack Development:** MERN Stack
- **Deployment & Hosting:** Vercel, Railway, Hostinger, AWS (Cloud Fundamentals, EC2)

PROFESSIONAL SKILLS

- Project Management & Coordination
- Adaptability and quick learning mindset
- Project coordination and teamwork
- Good understanding of software development lifecycle (SDLC)
- Team Leadership & Collaboration
- Agile Team Collaboration

EDUCATION

Higher Education

- Sri Lanka Institute of Information Technology -SLIIT
  - BSc (Hons) in Information Technology Specialization in Artificial Intelligence(UG)
- Diploma in English - Wayamba University of Sri Lanka

G.C.E. Advanced Level – 2023

- Maliyadeva Girls CollegeKurunegala
  - Index number – 7684380 / 3S (Biology, Physics, Chemistry)

G.C.E. Ordinary level – 2019

- Maliyadeva Girls College Kurunegala
  - Index number- 93221550 / A4 B5

CERTIFICATION

- Programming in Python - University of Moratuwa (e-certificate 2024)
- Aquinas collage of Higher Studies - Level 02 English (2024)
- AI for beginners (Digital business skills) - HP Life (e-certificate 2024)

CLUB ACTIVITIES

- AIESEC team member - OGV B2C
